# **Legal Information**

All Neousys Technology Inc. products shall be subject to the latest Standard Warranty Policy

Neousys Technology Inc. may modify, update or upgrade the software, firmware or any accompanying user documentation without any prior notice. Neousys Technology Inc. will provide access to these new software, firmware or documentation releases from download sections of our website or through our service partners.

Before installing any software, applications or components provided by a third party, customer should ensure that they are compatible and interoperable with Neousys Technology Inc. product by checking in advance with Neousys Technology Inc.. Customer is solely responsible for ensuring the compatibility and interoperability of the third party's products. Customer is further solely responsible for ensuring its systems, software, and data are adequately backed up as a precaution against possible failures, alternation, or loss.

For questions in regards to hardware/ software compatibility, customers should contact Neousys Technology Inc. sales representative or technical support.

To the extent permitted by applicable laws, Neousys Technology Inc. shall NOT be responsible for any interoperability or compatibility issues that may arise when (1) products, software, or options not certified and supported; (2) configurations not certified and supported are used; (3) parts intended for one system is installed in another system of different make or model.

# **Declaration of Conformity**

**FCC** 

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at own expense.

CE

The product(s) described in this manual complies with all applicable European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.

# **Copyright Notice**

This publication may not be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language or computer language, in any form or by any means, electronic, mechanical, magnetic, optical, chemical, manual or otherwise, without the prior written consent of Neousys Technology, Inc.

#### **Disclaimer**

This manual is intended to be used as an informative guide only and is subject to change without prior notice. It does not represent commitment from Neousys Technology Inc. Neousys Technology Inc. shall not be liable for any direct, indirect, special, incidental, or consequential damages arising from the use of the product or documentation, nor for any infringement on third party rights.

### Patents and Trademarks

Neousys, the Neousys logo, Expansion Cassette, MezIO<sup>TM</sup> are registered patents and trademarks of Neousys Technology, Inc.

Windows is a registered trademark of Microsoft Corporation.

Intel<sup>®</sup>, Core<sup>™</sup> are registered trademarks of Intel Corporation

NVIDIA<sup>®</sup>, GeForce<sup>®</sup> are registered trademarks of NVIDIA Corporation

All other names, brands, products or services are trademarks or registered trademarks of their respective owners.

# **Safety Precautions**

- Read these instructions carefully before you install, operate, or transport the system.
- Install the system or DIN rail associated with, at a sturdy location
- Install the power socket outlet near the system where it is easily accessible
- Secure each system module(s) using its retaining screws
- Place power cords and other connection cables away from foot traffic. Do not place items over power cords and make sure they do not rest against data cables
- Shutdown, disconnect all cables from the system and ground yourself before touching internal modules
- Ensure that the correct power range is being used before powering the device
- Should a module fail, arrange for a replacement as soon as possible to minimize down-time
- If the system is not going to be used for a long time, disconnect it from mains (power socket) to avoid transient over-voltage

# **Service and Maintenance**

- ONLY qualified personnel should service the system
- Shutdown the system, disconnect the power cord and all other connections before servicing the system
- When replacing/ installing additional components (expansion card, memory module, etc.), insert them as gently as possible while assuring proper connector engagement

## **ESD Precautions**

- Handle add-on module, motherboard by their retention screws or the module's frame/ heat sink. Avoid touching the PCB circuit board or add-on module connector pins
- Use a grounded wrist strap and an anti-static work pad to discharge static electricity when installing or maintaining the system
- Avoid dust, debris, carpets, plastic, vinyl and styrofoam in your work area.
- Do not remove any module or component from its anti-static bag before installation

# **About This Manual**

This manual introduces Neousys Nuvo-7000 series features Intel® 8th-Gen Core™ i hexa-core 35W/ 65W LGA1151 processors.

The guide also demonstrates the system's installation procedures.

## 1 Introduction

The Neousys Nuvo-7000 series is one of the world's first industrial-grade embedded computers to utilize Intel's 8<sup>th</sup> Gen. Coffee Lake Core i processors.

The latest Intel Coffee Lake processors are available in quad (Core-i3) to hexa (Core-i5 and i7) core configurations offering significant performance boosts over previous 6<sup>th</sup> and 7<sup>th</sup> Gen Core i processors. The system is based on Intel's Q370 platform and supports up to 32GB of DDR4-2666 memory.

Nuvo-7000E/P series

Nuvo-7000LP series

Nuvo-7000DE series

Nuvo-7000 series features multiple Neousys patented add-on technology options such as Cassette module, MezIOTM interface and supercapacitor-base power-backup solution for extra functionalities. Users can install off-the-shelf PCIe and PCI add-on card(s) into the expansion Cassette; select MezIO<sup>TM</sup> module for extra functions such as DIO, RS-232/ 422/ 485, GbE, USB3 or ignition power control; it is also compatible with PB-2500J, Neousys' patented supercapacitor-based power-backup solution.

Flexible and versatile for a variety of applications, Nuvo-7000 variants are available with different Cassette expansion options. With Neousys Nuvo-7000 series, you get a true rugged platform that can accommodate a single PCIe card (Nuvo-7000E series), dual PCIe cards (Nuvo-7000DE series) or a single PCI card (Nuvo-7000P series) according your application needs.

## 1.1.1 Nuvo-7000E Specifications

Applicable systems: Nuvo-7002E/ 7006E/ 7006E-PoE

Bith-Generation Coffee Lake CPU (LGA1151 socket, 35W/65W TDP) - Intel® Core ™ i7-8700/ i7-8700T - Intel® Core ™ i5-8500/ i5-8500T - Intel® Core ™ i5-8500/ i5-8500T - Intel® Celeron® G4900/ G5400T - Intel® Celeron® G4900/ G4900T  Chipset Intel® Q370 Platform Controller Hub  Graphics Integrated Intel® UHD Graphics 630  Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  POE+ IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget  via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD 2x Internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation  mSATA 1x full-size mSATA port (mux with mini-PCIe)	System Core		
Processor  - Intel® Core ™ i5-8500/ i5-8500T - Intel® Core ™ i3-8100/ i3-8100T - Intel® Celeron® G4900/ G5400T - Intel® Q370 Platform Controller Hub  Graphics Integrated Intel® UHD Graphics 630  Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  PoE+ 100 W total power budget  Via Intel native XHCl controller  4x USB 3.1 Gen2 (10Gbps) ports  4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation		8th-Generation Coffee Lake CPU (LGA1151 socket, 35W/65W TDP)	
- Intel® Core ™ i3-8100/ i3-8100T - Intel® Pentium® G5400/ G5400T - Intel® Celeron® G4900/ G4900T  Chipset Intel® Q370 Platform Controller Hub  Graphics Integrated Intel® UHD Graphics 630  Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCle Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation		- Intel® Core <sup>™</sup> i7-8700/ i7-8700T	
- Intel® Core ™ i3-8100/ i3-8100T - Intel® Pentium® G5400/ G5400T - Intel® Q370 Platform Controller Hub  Graphics Integrated Intel® UHD Graphics 630  Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 6x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget  via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	_	- Intel® Core <sup>™</sup> i5-8500/ i5-8500T	
- Intel® Celeron® G4900/ G4900T  Chipset Intel® Q370 Platform Controller Hub  Graphics Integrated Intel® UHD Graphics 630  Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 6x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  PoE+ IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget  via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Processor	- Intel® Core <sup>™</sup> i3-8100/ i3-8100T	
Chipset Intel® Q370 Platform Controller Hub Graphics Integrated Intel® UHD Graphics 630  Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 6x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  PoE+ 100 W total power budget  via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 1920 x 1200 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD RAID ARD RESIDENCE ARD RE		- Intel® Pentium® G5400/ G5400T	
Graphics Integrated Intel® UHD Graphics 630  Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 6x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation		- Intel® Celeron® G4900/ G4900T	
Memory Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)  AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  PoE+ IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface SATA HDD 2x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Chipset	Intel® Q370 Platform Controller Hub	
AMT Supports AMT 12.0  TPM Supports TPM 2.0  I/O Interface  Ethernet port 2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget  via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD 2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Graphics	Integrated Intel® UHD Graphics 630	
TPM Supports TPM 2.0  I/O Interface  Ethernet port 2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  PoE+ IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget via Intel native XHCl controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD 2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Memory	Up to 32 GB DDR4 2666/ 2400 SDRAM (two SODIMM slots)	
Ethernet port  Ethernet ports by I219 and I210 (Nuvo-7002E)  Ex Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE)  100 W total power budget  via Intel native XHCl controller  4x USB 3.1 Gen2 (10Gbps) ports  4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution  1x DVI-D connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)  2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  Ex Internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	AMT	Supports AMT 12.0	
Ethernet port  2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E) 6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  PoE+  IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE) 100 W total power budget  via Intel native XHCI controller 4x USB 3.1 Gen2 (10Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports 4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  ALI NVMe 2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	TPM	Supports TPM 2.0	
Ethernet port  6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)  IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE)  100 W total power budget  via Intel native XHCl controller  4x USB 3.1 Gen2 (10Gbps) ports  4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution  1x DVI-D connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)  2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting  RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	I/O Interface		
6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)   POE+	Eth ama at a aut	2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E)	
Via Intel native XHCI controller  4x USB 3.1 Gen2 (10Gbps) ports  4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution  1x DVI-D connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)  2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Ethernet port	6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E)	
via Intel native XHCl controller  4x USB 3.1 Gen2 (10Gbps) ports  4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution  1x DVI-D connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)  2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting  RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Dell	IEEE 802.3at PoE+ PSE for Port 3 ~ Port 6 (Nuvo-7006E-PoE)	
USB 4x USB 3.1 Gen2 (10Gbps) ports  4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution  1x DVI-D connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)  2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD 2x internal SATA port for 2.5" HDD/ SSD installation, supporting  RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	POE+	100 W total power budget	
4x USB 3.1 Gen1 (5Gbps) ports  1x VGA connector, supporting 1920 x 1200 resolution  1x DVI-D connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)  2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting  RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation		via Intel native XHCI controller	
Video Port  1x VGA connector, supporting 1920 x 1200 resolution 1x DVI-D connector, supporting 1920 x 1200 resolution 1x DisplayPort connector, supporting 4096 x 2304 resolution 2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	USB	4x USB 3.1 Gen2 (10Gbps) ports	
Video Port  1x DVI-D connector, supporting 1920 x 1200 resolution  1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)  2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting  RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCle Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation		4x USB 3.1 Gen1 (5Gbps) ports	
1x DisplayPort connector, supporting 4096 x 2304 resolution  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation		1x VGA connector, supporting 1920 x 1200 resolution	
Serial Port  2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2) 2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCle Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Video Port	1x DVI-D connector, supporting 1920 x 1200 resolution	
Serial Port  2x RS-232 ports (COM3/ COM4)  Audio  1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation		1x DisplayPort connector, supporting 4096 x 2304 resolution	
Audio 1x 3.5 mm jack for mic-in and speaker-out  Storage Interface  SATA HDD 2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Serial Port	2x software-programmable RS-232/ 422/ 485 ports (COM1/ COM2)	
Storage Interface  SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Senair on	2x RS-232 ports (COM3/ COM4)	
SATA HDD  2x internal SATA port for 2.5" HDD/ SSD installation, supporting RAID 0/ 1  M.2 NVMe  1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	Audio	1x 3.5 mm jack for mic-in and speaker-out	
SATA HDD  RAID 0/ 1  M.2 NVMe	Storage Interface		
M.2 NVMe 1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or Intel® OptaneTM Memory installation	SATA HDD	2x internal SATA port for 2.5" HDD/ SSD installation, supporting	
Intel® OptaneTM Memory installation	GATATIBB	RAID 0/ 1	
	M.2 NVMe	1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or	
mSATA 1x full-size mSATA port (mux with mini-PCIe)		Intel® OptaneTM Memory installation	
	mSATA	1x full-size mSATA port (mux with mini-PCIe)	

Internal Expansi	Internal Expansion Bus		
PCI Express	1x PCle x16 slot@Gen3, 8-lanes PCle signals in Cassette module		
Slot			
Mini DCL E	1x full-size mini PCI Express socket with internal SIM socket (mux		
Mini PCI-E	with mSATA)		
M.2	1x M.2 2242 B key socket with dual front-accessible SIM sockets		
IVI.Z	supporting dual SIM mode with selected M.2 LTE module		
Expandable I/O	1x MezIO <sup>™</sup> expansion port for Neousys MezIO <sup>™</sup> modules		
Power Supply			
DC Input	1x 3-pin pluggable terminal block for 8~35VDC DC input		
Remote Ctrl. &	1x 3-pin pluggable terminal block for remote control and PWR LED		
LED Output	output		
Mechanical			
Dimension	240 mm (W) x 225 mm (D) x 90 mm (H)		
Weight	3.58 Kg (approx.)		
Mounting	Wall-mounting (standard) or DIN-rail mounting (optional)		
Environmental			
	With 35W CPU		
Operation	-25°C ~ 70°C **		
Operating	With 65W CPU		
Temperature	-25°C ~ 70°C */** (configured as 35W TDP)		
	-25°C ~ 50°C */** (configured as 65W TDP)		
Storage	-40°C ~85°C		
Temperature	-40°C ~85°C		
Humidity	10%~90%, non-condensing		
Vibration	Operating, MIL-STD-810G, Method 514.6, Category 4		
o Shook	Operating, MIL-STD-810G, Method 516.6, Procedure I, Table		
o Shock	516.6-II		
EMC	CE/FCC Class A, according to EN 55032 & EN 55024		

<sup>\*</sup> i7-8700 running at 65W mode, the highest operating temperature shall be limited to 50°C and thermal throttling may occur when sustained full-loading applied. Users can configure CPU power in BIOS to obtain higher operating temperature.

<sup>\*\*</sup> For sub-zero operating temperature, a wide temperature HDD or Solid State Disk (SSD) is required.

## 1.1.2 Nuvo-7000P Specifications

Applicable systems: Nuvo-7002P/ 7006P/ 7006P-PoE

## Sth-Generation Coffee Lake CPU (LGA1151 socket, 35W/65W TDP)  - Intel® Core ™ I7-8700/ I7-8700T  - Intel® Core ™ I5-8500/ I5-8500T  - Intel® Core ™ I5-8500/ I5-8500T  - Intel® Celeron® G4900/ G5400T  - Intel® Celeron® G4900/ G4900T    Chipset   Intel® Q370 Platform Controller Hub	System Core

Intel® OptaneTM Memory installation  mSATA 1x full-size mSATA port (mux with mini-PCle)  Internal Expansion Bus	M 2 NVMe	1x M.2 2280 M key NVMe socket (PCIe Gen3/ x4) for NVMe SSD or	
Internal Expansion Bus	IVI.Z IV VIVIE	Intel® OptaneTM Memory installation	
· ,	mSATA	1x full-size mSATA port (mux with mini-PCIe)	
PCI Slot 1x PCI slot in Cassette	Internal Expansion Bus		
	PCI Slot	1x PCI slot in Cassette	

Mini PCI-E	1x full-size mini PCI Express socket with internal SIM socket (mux
	with mSATA)
M.2	1x M.2 2242 B key socket with dual front-accessible SIM sockets
IVI.∠	supporting dual SIM mode with selected M.2 LTE module
Expandable I/O	1x MezlO <sup>™</sup> expansion port for Neousys MezlO <sup>™</sup> modules
Power Supply	
DC Input	1x 3-pin pluggable terminal block for 8~35VDC DC input
Remote Ctrl. &	1x 3-pin pluggable terminal block for remote control and PWR LED
LED Output	output
Mechanical	
Dimension	240 mm (W) x 225 mm (D) x 90 mm (H)
Weight	3.58 Kg (approx.)
Mounting	Wall-mounting (standard) or DIN-rail mounting (optional)
Environmental	
	With 35W CPU
Operating	-25°C ~ 70°C **
Operating	With 65W CPU
Temperature	-25°C ~ 70°C */** (configured as 35W TDP)
	-25°C ~ 50°C */** (configured as 65W TDP)
Storage	-40°C ~85°C
Temperature	-40 6 ~83 6
Humidity	10%~90%, non-condensing
Vibration	Operating, MIL-STD-810G, Method 514.6, Category 4
* Shock	Operating, MIL-STD-810G, Method 516.6, Procedure I, Table
SHOCK	516.6-II
EMC	CE/FCC Class A, according to EN 55032 & EN 55024

<sup>\*</sup> i7-8700 running at 65W mode, the highest operating temperature shall be limited to 50°C and thermal throttling may occur when sustained full-loading applied. Users can configure CPU power in BIOS to obtain higher operating temperature.

<sup>\*\*</sup> For sub-zero operating temperature, a wide temperature HDD or Solid State Disk (SSD) is required.

## 1.1.3 Nuvo-7000DE Specifications

System Core		
	8th-Generation Coffee Lake CPU (LGA1151 socket, 35W/65W TDP)

## 1.2 Nuvo-7000E/P Dimension

#### 1.2.1 Nuvo-7000E/P Front Panel View

All measurements are in millimeters (mm).

Applicable to Nuvo-7002E, Nuvo-7006E, Nuvo-7002P, Nuvo-7006P systems.

### 1.2.2 Nuvo-7000E/P Rear Panel View

NOTE

All measurements are in millimeters (mm).

Applicable to Nuvo-7002E, Nuvo-7006E, Nuvo-7002P, Nuvo-7006P systems.

#### 1.2.3 Nuvo-7000E/P Top View

All measurements are in millimeters (mm).

Applicable to Nuvo-7002E, Nuvo-7006E, Nuvo-7002P, Nuvo-7006P systems.

### 1.2.4 Nuvo-7000E/P Bottom View

NOTE

All measurements are in millimeters (mm).

Applicable to Nuvo-7002E, Nuvo-7006E, Nuvo-7002P, Nuvo-7006P systems.

## 1.3 Nuvo-7000DE Dimension

### 1.3.1 Nuvo-7000DE Front Panel View

### 1.3.2 Nuvo-7000DE Rear Panel view

The numbers "2.5" represents the height of the rubber stands at 2.5mm.

## 1.3.3 Nuvo-7000DE Top View

### 1.3.4 Nuvo-7000DE Bottom View

## 1.4 Nuvo-7000LP Dimension

### 1.4.1 Nuvo-7000LP Front Panel View

### 1.4.2 Nuvo-7000LP Rear Panel View

The numbers "2.5" represents the height of the rubber stands at 2.5mm.

## 1.4.3 Nuvo-7000LP Top View

240.0

### 1.4.4 Nuvo-7000LP Bottom View

# 2 System Overview

Upon receiving and unpacking your Nuvo-7000 series system, please check immediately if the package contains all the items listed in the following table. If any item(s) are missing or damaged, please contact your local dealer or Neousys Technology.

## 2.1 Nuvo-7000 Series Packing List

System	Nuvo-7000	
Pack		
4	Nuvo-7000	4
'	(If you ordered CPU/ RAM/ HDD, please verify these items)	'
	Accessory box, which contains	
	<ul> <li>Neousys drivers &amp; utilities DVD</li> </ul>	1
	Wall-mount bracket	2
2	3-pin power terminal block	2
	Screw pack	8
	<ul> <li>Key to 2.5" external HDD/ SSD slot (Nuvo-7000LP systems only)</li> </ul>	1
		1

## 2.2 Front Panel I/O

The Nuvo-7000 systems' front panel features the following external I/O connections.

NOTE

For demonstration purposes, Nuvo-7000E/ P will be used in most illustrations. A dedicated illustration will be shown if the component is significantly different.

Nuvo-7000LP

No.	Item	Description
1	USB3.1 Gen 2 port	USB3.1 Gen 2 port (Superspeed+) offers up to 10Gbps, twice the
		bandwidth over existing SuperSpeed USB3.1 Gen. 1 connection. It is
		also backwards compatible with USB3.0 and USB2.0
2	<u>USB3.1</u>	USB3.1 Gen 1 offers up to 5Gbps of data-throughput performance
	Gen 1 port	
3	DVI port	DVI-D output supports resolution up to 1920x1200@60Hz and is
		compatible with other digital connections via an adapter.

4	4	VGA port	VGA output supports resolution up to 1920x1200@60Hz
	E	DisplayPort	Support display resolutions up to 4096 x 2304. Compatible with HDMI/
•	5		DVI via respective adapter/ cable (resolution may vary).
6	,	SIM 1 & 2	Install a 3G/4G module and insert a SIM card to access the operator's
	D		network.
	-	PoE+ GbE	2x Gigabit Ethernet ports by I219 and I210 (Nuvo-7002E/ P/ DE)
1	7	port	6x Gigabit Ethernet ports by I219 and 5x I210 (Nuvo-7006E/ P/ DE)
	•	Reset	Use this button to manual restart the system.
'	8	<u>button</u>	
		<u>LED</u>	From left to right, the LEDs are IGN (ignition control), WDT (watchdog
`	9	<u>indicators</u>	timer), HDD (hard disk drive) and PWR (system power).
		Power button	Power over Ethernet (PoE) port can provide both data connection and
10	0		electric power to devices, such as IP cameras (applicable to
			Nuvo-7006E/ P/ DE).
<u>u</u>	n	Cassette Enclosure	The cassette enclosure offers a separate compartment to manage
Area in	Greel		thermal conditions and reduce installation complications of an add-on
			card.
g	2.5" HDD/ SSD slot		
Area		SSD slot	The HDD expansion tray offer hot-swap ability.

#### 2.2.1 USB3.1 Gen 2 Port

The system's USB 3.1 Gen 2 ports (10Gbps) are implemented via native xHCl (eXtensible Host Controller Interface) controller and are backward compatible with USB3.1 Gen.1 USB 2.0, USB 1.1 and USB 1.0 devices. Legacy USB is also supported so you can use USB keyboard/mouse in DOS environment

xHCl driver is supported natively in Windows 10, therefore you do not need to install xHCl driver in prior to utilize USB functions.

#### 2.2.2 USB3.1 Gen 1 Port

The system's USB 3.0 Gen 1 ports (5Gbps) are implemented via native xHCI (eXtensible Host Controller Interface) controller and are backward compatible with USB 2.0, USB 1.1 and USB 1.0 devices. Legacy USB is also supported so you can use USB keyboard/mouse in DOS environment

xHCl driver is supported natively in Windows 10, therefore you do not need to install xHCl driver in prior to utilize USB functions.

#### 2.2.3 DVI Port

The system has a DVI connector on its I/O panel to support that supports independent display output. DVI transmits graphics data in digital format and therefore can deliver better image quality at high resolutions. For VGA monitor, Neousys offers a specialized DVI-to-VGA adapter as an accessory shipped with the system. This adapter supports VGA DDC signals and thus eliminates compatibility issues with VGA monitors. The DVI connector can output DVI or other digital signals via an adaptor or dedicated cable up to 1920 x 1200 resolution.

The system supports triple independent display outputs by connecting display devices to VGA, DVI and DisplayPort connection. To support multiple display outputs and achieve best DVI output resolution in Windows, you need to install corresponding graphics drivers. Please refer to section OS Support and Driver Installation for details.

#### 2.2.4 VGA Port

VGA connector is the most common video display connection. The VGA output supports up to 1920x1200@60Hz resolution. By default, the VGA output is set to "always-on". For users who want to use only digital display interface (eg. DVI or DP), the VGA Output setting can be disabled. To disable, press F2 upon system startup, go to "Advanced > System Agent (SA) Configuration > Graphics Configuration > VGA Output > [Disable].

The system supports triple independent display outputs by connecting display devices to VGA, DVI and DisplayPort connection. To support multiple display outputs and achieve best DVI output resolution in Windows, you need to install corresponding graphics drivers. Please refer to section OS Support and Driver Installation for details.

#### NOTE

Please make sure your VGA cable includes SDA and SCL (DDC clock and data) signals for correct communication with monitor to get resolution/timing information. A cable without SDA/SCL can cause blank screen on your VGA monitor due to incorrect resolution/timing output.

### 2.2.5 DisplayPort

The system has a DisplayPort (DP) output which is a digital display interface that mainly connect video source and carry audio to a display device. When connecting a DP, it can deliver up 2880 x 1800 in resolution. The system is designed to support passive DP adapter/ cable. You can connect to other display devices using DP-to-HDMI cable or DP-to-DVI cable.

The system supports triple independent display outputs by connecting display devices to VGA, DVI and DisplayPort connection. To support multiple display outputs and achieve best DVI output resolution in Windows, you need to install corresponding graphics drivers. Please refer to section OS Support and Driver Installation for details.

# 2.2.6 Micro-SIM (3FF) 1 & 2 Slots

On the front panel, there are two panel-accessible Micro-SIM sockets. By installing 3G/4G modules onto the internal M.2 slot, you can access the internet via telecom operator's network. The Micro-SIM slots can be accessed by loosening the screw (indicated in red) that holds the Micro-SIM slot cover and Micro-SIM cards are secured into the sockets via push-push type mechanisms. The push-push mechanism means the SIM card is push-to-install and push-to-retrieve. Please note that the micro-SIM card must be inserted upside down (gold fingers facing upward).

#### 2.2.7 Ethernet Port/ PoE+

All Nuvo-7000 series systems offer two GbE ports (in red and blue) while Nuvo-7006E/P/DE systems have four additional PoE (Power over Ethernet) ports marked in green on the front panel. The port marked in blue is implemented using Intel® I219-LM controller that supports Wake-on-LAN and is also compatible with Intel® AMT (Active Management Technology) to support advanced features such as remote SOL desktop and remote on/off control.

Power over Ethernet (PoE) supplies electrical power and data on a standard CAT-5/CAT-6 Ethernet cable. Acting as a PoE PSE (Power Sourcing Equipment), compliant with IEEE 802.3at, each PoE port delivers up to 25W to a Powered Device (PD). PoE can automatically detect and determine if the connected device requires power or not, so it is compatible with standard Ethernet devices as well.

Each port has one dedicated PCI Express link for maximum network performance. Please refer to the table below for LED connection statuses.

#### Active/Link LED (Right)

LED Color	Status	Description
	Off	Ethernet port is disconnected
Yellow	On	Ethernet port is connected and no data transmission
	Flashing	Ethernet port is connected and data is transmitting/receiving

Speed LED (Left)

LED Color	Status	Description
0	Off	10 Mbps
Green or Orange	Green	100 Mbps
2.290	Orange	1000 Mbps

To utilize the GbE port in Windows, you need to install corresponding driver for Intel<sup>®</sup> I210-IT/ I219-LM GbE controller.

### 2.2.8 Reset Button

The reset button is used to manually reset the system in case of system halt or malfunction. To avoid unexpected reset, the button is purposely placed behind the panel. To reset, please use a pin-like object (eg. tip of a pen) to access the reset button

# 2.2.9 LED Indicators

There are four LED indicators on the I/O panel: PWR, UID, WDT and HDD. The descriptions of these three LED are listed in the following table.

Indicator	Color	Description		
IGN	Green Ignition signal indicator, lid when IGN is high (12V/ 24V).			
WDT	Yellow	Watchdog timer LED, flashing when WDT is active.		
HDD	Red	Hard drive indicator, flashing when hard disk drive is active.		
PWR	Green	Power indictor, lid when system is on.		

#### 2.2.10 Power Button

The power button is a non-latched switch for ATX mode on/ off operation. To turn on the system, press the power button and the PWR LED should light-up green. To turn off the system, issuing a shutdown command in OS is preferred, or you can simply press the power button. To force shutdown when the system freezes, press and hold the power button for 5 seconds. Please note that there is a 5-second interval between on/off operations (i.e. once the system is turned off, there is a 5-second wait before you can power-on the system).

# 2.2.11 Hot-swappable 2.5" HDD/ SSD Slot (Nuvo-7000LP Series Only)

The Nuvo-7000LP series supports an external 2.5" HDD/ SSD via a hot-swappable slot. Designed for easy access, the HDD/ SSD slot is secured by a lock (indicated in **red**)and it supports RAID modes 0/1 configuration by combining with the internal HDD/ SSD drive for OS installation (coupled with the internal HDD). To set up RAID, please refer to RAID Volume Configuration section for details.

#### 2.2.12 Cassette Module

Neousys' patented expansion Cassette (R.O.C. Patent No. M456527) provides a separated compartment to accommodate an add-on card. It effectively manages thermal conditions of both the system and the add-on card. The modular concept brought by Cassette module also reduces the complexity of installing and replacing an add-on card in the fanless controller.

The Cassette module incorporates an innovative mechanical design to effectively deal with the heat generated by GPU. This patented architecture (R.O.C. Patent No. M534371) creates a sealed wind tunnel to bring in cold air to the GPU and expels hot air via a system fan. The design offers the system extreme stability and reliability.

Expansion configuration System	Expansion slot(s)
Nuvo-7000E series	Single PCI Express slot
Nuvo-7000P series	Single PCI slot
Nuvo-7000DE series	Dual PCI Express slots

# 2.3 Rear Panel I/O

Nuvo-7000LP

The Nuvo-7000 rear panel features MezIO<sup>™</sup> port, four (4) COM ports, 3-pin terminal and 3-pin on/ off control. The Cassette module can be located at the bottom of the enclosure. The connectors of the installed PCI or PCIe card within the Cassette module can be accessed from this side of the panel.

No.	Item	Description				
1	MezIO <sup>TM</sup> I/O	Reserved for MezIO <sup>TM</sup> I/O connector. Connector may vary depending on your choice of MezIO <sup>TM</sup> .				
2	4-Pole 3.5mm headphone/ microphone jack	The 4-pole 3.5mm jack accepts microphone voice input and headphone speaker sound output.				
3	COM ports 1-4	The four COM ports offer communication with external devices.				
4	3-pin terminal	Compatible with DC power input from 8~35V, the terminal				

	block (DC/	block is also used for ignition signal input.
	ignition input)	
_	3-pin Remote	Allows for external switch extension when the system is
5	on/ off control	placed inside a cabinet.
Area	Connetto	The cassette enclosure offers a separate compartment to
in	<u>Cassette</u>	manage thermal conditions and reduce installation
green	<u>Enclosure</u>	complications of an add-on card.
Area	Decembed nort	The area indicated in red on the rear panel of Nuvo-7000LP
	Reserved port	series feature reserved port opening/ cover for additional
in red	opening/ cover	COM ports.

# 2.3.1 4-Pole 3.5mm Headphone/ Microphone Jack

The system audio function uses high definition audio Realtek ALC262 codec on Intel® Q370 chipset. There is a female 4-pole audio jack for headphone (speaker) output and microphone input. To utilize the audio function in Windows, you need to install corresponding drivers for both Intel® Q370 chipset and Realtek ALC262 codec.

# 2.3.2 COM Ports

The system provides four COM ports for communicating with external devices. These COM ports are implemented using industrial-grade ITE8786 Super IO chip (-40 to 85°C) and provide up to 115200 bps baud rate.

COM1 and COM2 (in **red**) are software-configurable RS-232/422/485 ports. COM3 and COM4 (in **blue**) are standard 9-wire RS-232 ports. The operation mode of COM1 and COM2 can be set in BIOS setup utility. The following table describes the pin definition of COM ports.

# **COM Port Pin Definition**

		COM1 & CO	DM2	COM3 & COM4
Pin#	RS-232 Mode	RS-422 Mode	RS-485 Mode (Two-wire 485)	RS-232 Mode
1	DCD			DCD
2	RX	422 TXD+	485 TXD+/RXD+	RX
3	TX	422 RXD+		TX
4	DTR	422 RXD-		DTR
5	GND	GND	GND	GND
6	DSR			DSR
7	RTS			RTS
8	CTS	422 TXD-	485 TXD-/RXD-	CTS
9	RI			RI

# 2.3.3 3-Pin Terminal Block for DC and Ignition Input

The system accepts a wide range of DC power input from 8 to 35V via a 3-pin pluggable terminal block, which is fit for field usage where DC power is usually provided. The screw clamping mechanism on the terminal block offers connection reliability when wiring DC power.

In addition to DC power input, this terminal block can also accept ignition signal input (IGN) when ignition control module (eg. MezIO-V20) is installed for in-vehicle applications.

#### **WARNING**

Please make sure the voltage of DC power is correct before you connect it to the system. Supplying a voltage over 35V will damage the system.

### 2.3.4 3-Pin Remote On/ Off

The "Remote On/ Off" 3-pin connection allows for external switch extension. It is useful when the system is placed in a cabinet or a not easily accessed location.

# 2.4 Internal I/O Functions

In addition to I/O connectors on the front panel, the system also provides internal on-board connectors, such as remote on/off control, LED status output, internal USB 2.0 ports, etc. In this section, we'll illustrate these internal I/O functions.

#### 2.4.1 Dual DRAM SODIMM Slot

The system motherboard supports two 260-pin SODIMM socket for installing DDR4 memory module up to 32GB. Each slot supports single module DDR4 2666MHz SODIMM up to 16GB capacity.

NOTE

When changes are made to DRAM module(s), such as additionally install or remove and reinstall (into the same/ different slot, it will result in an approximately 20-second delay when booting up for the first time after such change(s).

#### 2.4.2 Dual Mode mSATA/ mini-PCle Socket & Pin Definition

The system provides a dual mode mSATA/ mini-PCle socket (indicated in **blue**) that is in compliance with mini-PCle specification rev. 1.2. You can install either an mSATA SSD or mini-PCle module into this socket and the system will automatically detect and configure it to run PCle or SATA signals. This mini-PCle socket is designed with SIM card (slot indicated in **red**) support. With a SIM card installed, your system can access the internet via your network provider's 3G/4G network.

For wireless (WIFI/ 3G/ 4G) communication, multiple SMA antenna apertures can be located on the front and rear panel.

Front panel antennae opening

Rear panel antennae opening

# **A** WARNING

Some off-the-shelf mini-PCIe 4G modules are not compliant to standard mini-PCIe interface. They use 1.8V I/O signals instead of standard 3.3V I/O and may have signal conflict. Please consult with Neousys for compatibility when in doubt! Installing an incompatible 4G module may damage the system or the module itself may be damaged.

# 2.4.3 M.2 2242 (B Key), Pin Definition & Mini-SIM Card Slot

The system has an M.2 2242 slot (indicated in blue) that works with dual SIM slots (4G + 3G) on the front panel (indicated in red). By installing a 3G or 4G M.2 module and SIM card, you can access the internet via the provider's network.

For wireless 3G/4G, SMA antenna apertures are located on front/ rear panels.

Front panel antennae opening

Rear panel antennae opening

### 2.4.4 SATA Ports

The system provides two SATA ports which support Gen3, 6 Gb/s SATA signals. Each SATA port (indicated in blue) features a 7-pin SATA connector and a 4-pin power connector.

The power connector (indicated in **red**) accommodates a 2.5" HDD/ SSD in internal HDD bracket. Standard 22-pin SATA connectors are provided with the system. You may refer to the SATA Configuration section for SATA settings.

# 2.4.5 Dip Switch

There is a dip switch (indicated in **blue**) on the motherboard and it is responsible for PCle lane configuration. They should be set to default for you system out of the factory so you need not configure them. The table below shows the system default dip switch settings for reference purposes.

Dip switch	Dip switch 1	Dip switch 2	Dip switch 3	Dip switch 4
Nuvo-7000E	Off	Off	Off	Off
Nuvo-7000P	Off	Off	Off	Off
Nuvo-7000LP	Off	Off	Off	Off
Nuvo-7000DE	Off	On	Off	Off

# 2.4.6 Internal USB 2.0 Port

The system's motherboard has an internal USB2.0 port on the PCBA. You can utilize this USB port to connect a USB protection dongle inside the chassis of the system.

# 2.4.7 M.2 2280 (M Key) Slot for NVMe SSD or Optane<sup>™</sup> Memory

The system has an x4 PCIe M.2 2280 slot for you to install an NVMe SSD for the ultimate performance or an Intel® Optane<sup>TM</sup> memory to accelerate the read/ write performances of traditional hard disk drive. An NVMe SSD offers exceptional performance over 2.5" SSDs while Intel® Optane<sup>TM</sup> memory can dramatically boost your traditional hard disk drive's read/ write performances.

# 2.4.8 MezIO<sup>™</sup> Interface & Pin Definition

MezIO<sup>TM</sup> is an innovative interface designed for integrating application-oriented I/O functions into an embedded system. It offers computer signals, power rails and control signals via a high-speed connector. MezIO<sup>TM</sup> is also mechanically reliable benefited from its 3-point mounted mezzanine structure. A MezIO<sup>TM</sup> module can leverage these signals to implement comprehensive I/O functions.

The system incorporates MezIO<sup>TM</sup> interface and universal mechanical design to accommodate Neousys' standard MezIO<sup>TM</sup> modules. For customers who want to develop their own MezIO<sup>TM</sup> module, Neousys provides MezIO<sup>TM</sup> design documents on a NDA basis. Please contact Neousys for further information.

# MezIO<sup>™</sup> Interface Pin Definition

MezIO<sup>™</sup> interface leverages FCI BERGSTAK® board-to-board connector to provide interconnectivity of high-speed signals. The receptacle part on the PCBA is FCI 61082-063402LF while the plug part on the MezIO<sup>™</sup> module is FCI 61083-064402LF. Please refer to the following table for signal definition of its 60-pos connector.

# 3 System Installation

Before disassembling the system enclosure and installing components and modules, please make sure you have done the following:

- It is recommended that only qualified service personnel should install and service this product to avoid injury or damage to the system.
- Please observe all ESD procedures at all times to avoid damaging the equipment.
- Before disassembling your system, please make sure the system has powered off, all cables and antennae (power, video, data, etc.) are disconnected.
- Place the system on a flat and sturdy surface (remove from mounts or out of server cabinets) before proceeding with the installation/ replacement procedure.

# 3.1 Disassembling the System

To access system internal components, the system needs to be disassembled. To disassemble the system enclosure, you need to remove the Cassette module and screws on both I/O panels.

1. Remove the four screws at the bottom of the Cassette module...

#### **NOTE**

Not applicable to Nuvo-7000LP systems.

2. Gently wiggle and separate the Cassette module from the system.

### NOTE

Not applicable to Nuvo-7000LP systems.

3. On the front I/O panel, remove the hexa-screws indicated below.

Nuvo-7000E/ P/ DE systems

Nuvo-7000LP systems

4. Remove the front I/O panel.

Nuvo-7000E/ P/ DE systems

Nuvo-7000LP systems

5. One the rear I/O panel, remove the hexa-screws indicated below.

Nuvo-7000E/ P/ DE systems

Nuvo-7000LP systems

6. Remove the rear I/O panel.

Nuvo-7000E/ P/ DE systems

Nuvo-7000LP systems

7. Gently lift the system's bottom panel.

Nuvo-7000E/ P/ DE systems

Nuvo-7000LP systems

# NOTE

For Nuvo-7000LP systems, please disengage the 22-pin SATA cable connected to the 2.5" hot swappable tray before removing the bottom panel.

8. Once the bottom panel has been removed, you should have access to the system's internal I/O interfaces.

# 3.2 Installing Internal Components

NOTE

For demonstration purposes, Nuvo-7000E/ P will be used in most illustrations. A dedicated illustration will be shown if the component is significantly different.

# 3.2.1 CPU Installation Procedure

- 1. To install the CPU, you will need to separate the heatsink and the motherboard.
- 2. To do so, remove the nine screws indicated below.

3. Gently separate the motherboard from the heatsink, you'll see the CPU socket protective cover, place finger tips underneath the sign "REMOVE" for leverage and gently lift the cover.

With the protective cover removed, please be careful when handling the motherboard. DO NOT touch the pins in the LGA socket!

4. Remove the CPU from its container/ tray. Match the two notches on the side to the protrusions in the socket, gently lower the CPU into the socket.

5. Locate the CPU retention bracket from the accessory box. Place the retention bracket on the CPU and hold it in place.

6. Turn the motherboard around and secure the bracket by tightening two M3 P-head screws.

Hold CPU bracket firmly and turn the motherboard around

Secure two M3 P-head screws

7. Remove all thermal pads' protective films on the heatsink.

8. With the four motherboard standoffs aligned, gently lower the motherboard onto the heatsink and secure the four screws.

9. Once the motherboard has been installed, you're ready to secure the five screws that help the heatsink apply pressure to the CPU/ chipset die. You'll want to apply even pressure to the corners by gradually tightening each screw. Please refer to the recommended order when tightening the screws.

- 10. Reinstall the system panels and Cassette module when done.
- 11. If you need to install other components, please refer to respective sections.

#### 3.2.2 DDR4 SO-DIMM Installation

There are two SO-DIMM memory slots (indicated in **blue**) on the motherboard that supports a total maximum of 32GB DDR4-2666. Please follow the procedures below to replace or install the memory modules.

- 1. Please refer to the section "Disassembling the System".
- 2. Locate the SODIMM memory module slots on the motherboard.

3. To install the memory module, insert gold fingers into the slot at 45-degree angle, push down on the memory module to clip the module into position.

4. Push the memory module down until it is clipped-in.

- 5. Repeat steps 3 and 4 to install the other module.
- 6. Reinstall the system enclosure and panel when done.
- 7. If you need to install other components, please refer to respective sections.

#### 3.2.3 mPCle Module, Mini-SIM (2FF) Card and Antennae Installation

The system has an mPCle slot (indicated in blue) coupled with Mini-SIM socket (indicated in red) for installing 3G/4G module. For installation, please refer to the following instructions.

- 1. Please refer to the section "Disassembling the System".
- 2. Locate the mPCle and SIM card slots on the motherboard.

3. Before installing the mPCIe module, you need to insert the Mini-SIM card. Slide the SIM slot holder and lift the SIM card holder. Insert the Mini-SIM card (pins facing up), shut the SIM holder and slide it to lock the SIM card in-place.

Insert Mini-SIM card with pins facing up

4. Secure the Mini-SIM card by sliding the holder.

5. Insert the mPCIe module on a 45 degree angle into the mPCIe slot and secure the module.

Insert on 45 degree angle

Secure the module

6. Clip on the IPEZ-to-SMA cable to the module and secure the antenna to the rear panel. Please refer to the module's manual for clip-on connection.

Clip on IPEZ-to-SMA cable

Secure antenna to rear panel

- 7. Reinstall the system enclosure and panel when done.
- 8. If you need to install other components, please refer to respective sections.

## 3.2.4 M.2 2242 (B Key) Module and Micro-SIM (3FF) Card Installation

The system has a mini-PCIe slot (indicated in blue) for installing 3G/4G or a WiFi module that can be coupled with dual Micro-SIM card slots (indicated in red). For installation, please refer to the following instructions.

- 1. Please refer to the section "Disassembling the System".
- 2. Locate the M.2 2242 (B Key) and SIM card slots on the motherboard.

3. Insert the module on a 45 degree angle.

4. Gently press down and secure the module with an M2.5 P-head screw.

5. Clip on the IPEZ-to-SMA cable to the module and secure the antenna to the rear panel. Please refer to the module's manual for clip-on connection.

#### Clip on IPEZ-to-SMA cable

Secure antenna to rear panel

- 6. With the motherboard exposed, the SIM card is inserted with the gold fingers facing downward. If you are inserting the SIM card with the system upright (heatsink fins upwards), the gold fingers should be facing upward. The SIM socket is a push-push type. The push-push mechanism means the SIM card is push-to-install and push-to-retrieve
- 7. Reinstall the system enclosure and panel when done.
- 8. If you need to install other components, please refer to respective sections.

# 3.2.5 M.2 2280 NVMe SSD or Intel<sup>®</sup> Optane<sup>TM</sup> Memory Installation

The system has an x4 PCIe M.2 2280 slot for you to install an NVMe SSD for the ultimate performance or an Intel® Optane<sup>TM</sup> memory to accelerate the read/ write performances of traditional hard disk drive. An NVMe SSD offers exceptional performance over 2.5" SSDs while Intel® Optane<sup>TM</sup> memory can dramatically boost your traditional hard disk drive's read/ write performances. For installation, please refer to the following instructions.

- 1. Please refer to the section "<u>Disassembling the System</u>", you may not need to completely dismantle the system to gain access to the mini-PCIe slot.
- 2. Insert the module on a 45 degree angle.

3. Gently press down and secure the module with an M2.5 P-head screw.

- 4. Reinstall the system enclosure and panel when done.
- 5. If you need to install other components, please refer to respective sections.
- 6. Please refer to the section <a href="Intel® Optane™ Memory BIOS Setup and Driver">Intel® Optane™ Memory BIOS Setup and Driver</a>
  <a href="Installation">Installation</a> for traditional hard drive acceleration.

# 3.2.6 MezIO<sup>TM</sup> Module Installation

MezIO<sup>TM</sup> is an innovative interface designed for integrating application-oriented I/O functions into an embedded system. It offers computer signals, power rails and control signals via a high-speed connector. MezIO<sup>TM</sup> is also mechanically reliable benefited from its 3-point mounted mezzanine structure. A MezIO<sup>TM</sup> module can leverage these signals to implement comprehensive I/O functions.

The system incorporates MezIO<sup>TM</sup> interface and universal mechanical design to accommodate Neousys' standard MezIO<sup>TM</sup> modules. For customers who want to develop their own MezIO<sup>TM</sup> module, Neousys provides MezIO<sup>TM</sup> design documents on a NDA basis. Please contact Neousys for further information.

 Please refer to the section "<u>Disassembling the System</u>", you may not need to completely dismantle the system to gain access to the MezIO<sup>™</sup> interface.

2. The MezIO module is secured by the three stand-mounts indicated in the illustration below.

 Gently lower the MezIO<sup>TM</sup> module onto the three stand-mounts while matching the MezIO interface. Secure the module using three screws supplied.

- 4. Reinstall the system enclosure and panel when done.
- 5. If you need to install other components, please refer to respective sections.

## 3.2.7 HDD/ SSD Installation (Nuvo-7000E/ P/ DE Systems)

The system has two SATA ports (indicated in **blue**) and two four pin power connectors (indicated in **red**). The SATA and power cables should already be connected on the motherboard so users only need to install the HDD/ SSD. Please refer to the following instructions on how to install 2.5" SATA HDD/ SSD.

1. Turn the system upside-down and remove the three screws indicated in the illustration below and lift the tray out of the system.

 Remove the protective film covering the HDD/ SSD thermal pad. Place the HDD/ SSD (with labels facing up) and match the SATA connector end to the side with the single screw hole (indicated in blue), secure the HDD/ SSD with the supplied flathead screws (4 per drive).

3. At the tray opening, you should be able to locate the 22-pin SATA cable, connect it to the installed HDD/ SSD.

4. Gently put the tray back into the system with the connector side being inserted into the system first and secure the tray with three screws.

Reinsert the tray

Securing the tray

5. If you need to install other components, please refer to respective sections.

## 3.2.8 HDD/ SSD Installation (Nuvo-7000LP Systems Only)

The system has two SATA ports (indicated in **blue**) and two four pin power connectors (indicated in **red**). The SATA and power cables should already be connected on the motherboard so users only need to install the HDD/ SSD. A 2.5" SATA HDD/ SSD can be installed to the internal tray or the front hot-swappable tray.

To install a HDD/ SSD to the internal tray please perform the following procedure:

1. Please turn the system upside-down and remove the screws indicated.

2. Take the tray out of the system, and remove the protective film covering the thermal pad.

3. Place the HDD/ SSD onto the tray with the label side facing upward and the SATA connector facing the side with two screw holes. Secure with flathead screws (two on each side).

4. Insert the connector end first, of the installed HDD/ SSD and tray into the system.

5. Secure using the three screws that were removed earlier.

#### 3.2.9 HDD/ SSD Installation to Hot Swappable Tray (Nuvo-700LP Systems Only)

The system features a 2.5" external hot-swappable HDD/ SSD slot. It coincides with the internal drive and can be configured into RAID 0 or 1 storage. To install HDD/ SSD into the 2.5" external hot-swappable slot, please refer to the following procedure:

1. Pull the handle on the 2.5" external hot-swappable slot to open it.

**Pull handle** 

Open slot door

 With the label side facing upward, insert the SATA connector side of the 2.5" HDD/ SSD into the slot first. You may feel resistance when the SATA connectors meet, push it firmly until the 2.5" HDD/ SSD is fully inserted into the slot.

3. Push the handle into the 2.5" slot until it snaps into position. A key is provided (in accessory box) to lock the external slot.

2.5" HDD/ SSD slot lock

#### 3.2.10 PCIe/ PCI Card Installation into Cassette Module (Nuvo-7000E/ P/ DE Only)

#### **NOTE**

Nuvo-7000E/ P and Nuvo-7000DE systems' Cassette module share the exact same screw locations and removal procedure, therefore a Nuvo-7000E/ P will be used for demonstration.

The Cassette module provides a separated compartment to accommodate add-on card(s). It compartmentalizes the heat generated and effectively manages thermal conditions of both the system and add-on card(s). The modular design reduces the complexity of installing and replacing add-on card(s) in the fanless controller. In addition, the mechanical design creates a sealed wind tunnel to bring in cold air to the GPU and expels hot air via a system fan to offer the system extreme stability and reliability. To install a PCIe/ PCI card into the Cassette module, please refer to the following procedure:

1. Turn the system upside-down and remove the four screws.

2. Gently wiggle the Cassette module and separate it from the system enclosure.

3. Remove the screw to open the Cassette cover.

 Remove the bezel cover (indicated in blue circle) and insert the card into the PCIe/ PCI slot while making sure the bezel is properly inserted into the notch and the card is secured in place with screw.

Remove bezel cover

Make sure the card is inserted into the notch and secured with a screw

Nuvo-7000DE systems have two PCIe slots in the Cassette module

Make sure both cards are inserted into their notches and secured with screws.

5. Secure the screw indicated in the blue circle.

6. Gently lower the Cassette module back onto the system enclosure and secure the module onto the system enclosure by securing the following screws.

# 3.3 Installing the System Enclosure

1. To reinstall the system enclosure, place the bottom panel on top of the motherboard while making sure both sides are inserted into the heatsink (indicated in blue).

Nuvo-7000E/ P/ DE systems

## Nuvo-7000LP systems

# NOTE

For Nuvo-7000LP systems, please connect the 22-pin SATA cable connected to the 2.5" hot swappable tray before installing the bottom panel.

2. Install the front panel and secure screws indicated in blue.

Nuvo-7000E/ P/ DE systems

Nuvo-7000LP systems

3. Install the rear panel and secure screws indicated in blue.

Nuvo-7000E/ P/ DE systems

Nuvo-7000LP systems

4. Install the Cassette module and secure screws indicated in blue.

# NOTE

Not applicable to Nuvo-7000LP systems.

# 3.4 Wall Mount Bracket/ DIN-rail Installation

Nuvo-7000 series ships with dedicated wall mount and DIN-rail (optional).

#### NOTE

You will need to remove the four (4) rubber stands at the bottom of the enclosure if they have been attached.

#### 3.4.1 Wall Mount Bracket Installation

To install the system as a wall mount device, please refer to the following instructions.

1. Take out the two wall mount brackets and four (4) M4 screws out of the accessory box. Fix the wall mount brackets to the system enclosure using M4 screws.

2. Place the system on a flat surface portion of the wall and secure it with four (4) M4 pan screws.

## 3.4.2 DIN-rail Installation (Optional)

The system also comes with an optional DIN-rail mounting kit. The kit includes a bracket and a DIN-rail mounting clip. By fixing the clip to the bracket using four M4 flat-head screws and fixing the bracket assembly to the system four M4 screws, complete the installation by clipping the system onto the DIN rail. This option may be useful if you want to deploy it inside an equipment cabinet where DIN rail is available.

# 3.5 Powering On the System

There are three methods to power on the system

- Pressing the power button
- Using an external non-latched switch by connecting to the remote on/ off plug
- Sending a LAN packet via Ethernet (Wake-on-LAN)

### 3.5.1 Powering On Using the Power Button

This is the simplest way to turn on your system. The power button on the front panel is a non-latched switch and behaves as the ATX-mode on/off control. With DC power connected, pushing the power button will turn on the system and the PWR LED indicator will light up. Pushing the button when system is on will turn off the system. If your operating system supports ATX power mode (i.e. Microsoft Windows or Linux), pushing the power button while the system is in operation will result in a pre-defined system behavior, such as shutdown or hibernation.

#### 3.5.2 Powering On Using External Non-latched Switch

If your application demands the system to be placed inside a cabinet, you may use an external non-latched switch to power on/ off the system. The system provides a 3-pin "Remote On/ Off" plug for connecting a non-latched switch and acts as the ATX-mode power on/off control switch. The external non-latched switch acts exactly the same as the power button on the front panel. To setup and power on/ off the system using an external non-latched switch (ATX-mode), please follow the steps described below.

- 1. Acquire a non-latched switch with 3-pin plug.
- 2. Connect the non-latched switch to the Remote On/ Off plug.

3. With DC power connected, pushing the power button will turn on the system and the PWR LED indicator will light up. Pushing the button when system is on will turn off the system. If your operating system supports ATX power mode (i.e. Microsoft Windows or Linux), pushing the power button while the system is in operation will result in a pre-defined system behavior, such as shutdown or hibernation.

#### 3.5.3 Powering On Using Wake-on-LAN

Wake-on-LAN (WOL) is a mechanism to wake up a computer system from a S5 (system off with standby power) state via issuing a magic packet. The system's Wake-on-LAN compatible GbE port is shown below.

#### NOTE

Please make sure the Intel® chipset and Ethernet driver has been properly installed prior to setting up WOL function.

To enable WOL function, please set up WOL settings in the BIOS and in the operating system by follow the steps described below.

- 1. When the system boots up, press F2 to enter BIOS setup utility.
- 2. Go to the [Power] > [Wake On LAN] and set it to [Enabled].

3. Press F10 to "Save changes and exit BIOS" and allow the system boot into the

operating system.

Once booted into the
Windows system, press
"Windows key + E",
right-click on "Network
> Properties > Change
adapter settings".
Locate and double-click
on the adapter Intel®
I219 Gigabit Network
Connection, click on
Configure...

5. Click on the **Power Management** tab and check the following options. Click on OK when done.

#### **Magic Packet**

The magic packet is a broadcast frame containing anywhere within its payload 6 bytes of all 255 (FF FF FF FF FF in hexadecimal), followed by sixteen repetitions of the target computer's 48-bit MAC address.

For example, NIC's 48-bit MAC Address is 78h D0h 04h 0Ah 0Bh 0Ch DESTINATION SOURCE MISC

FF FF FF FF FF

78 D0 04 0A 0B 0C 78 D0 04 0A 0B 0C

MISC CRC

There are some free tools available on Internet that can be used to send a magic packet. Please refer to the following link to understand more about Magic Packet.

# 4 System Configuration

# 4.1 BIOS Settings

The system is shipped with factory-default BIOS settings meticulously programmed for optimum performance and compatibility. In this section, we'll illustrate some of BIOS settings you may need to modify. Please always make sure you understand the effect of change before you proceed with any modification. If you are unsure of the function you are changing, it is recommended to change one setting at a time to see its effect(s).

NOTE

Not all BIOS settings will be discussed in this section. If a particular setting/ function you are after requires specific BIOS settings but is not discussed in this section, please contact Neousys Technical Support staff.

#### 4.1.1 COM Port Configuration

The system's <u>COM1/COM2</u> ports support RS-232 (full-duplex), RS-422 (full-duplex) and RS-485 (half-duplex) mode. You can set the COM1 operating mode via BIOS settings. Another option in BIOS called "*Slew Rate*" defines how sharp the rising/falling edge is for the output signal of COM1. For long-distance RS-422/485 transmission, you may set the "*Slew Rate*" option as "High" to improve signal quality. For RS-422/485 communication, the "*RS-422/485 Termination*" option determines whether to enable/disable internal termination of RS-422/485 transceiver according to your wiring configuration (e.g. with or without external termination).

#### To set COM port operating mode:

- 1. Press **F2** when the system boots up to enter the BIOS setup utility.
- 2. Go to [Advanced] [Peripheral Configuration].
- 3. Set the [Set COM1 Mode as] option to the desired mode.
- 4. Once set, press **F10** to save setting and exit.

#### 4.1.2 SATA Configuration

The SATA controller of your system supports two (2) operating modes: AHCI and Intel RST Premium With Intel Optane System Acceleration mode. The AHCI mode, which exposes SATA's advanced capabilities such as hot swapping and native command queuing, is supported in several later version of operating systems. The Intel RST Premium With Intel Optane System Acceleration mode allows the user to greatly accelerate SATA hard drive read/ write speeds by installing an Optane memory into the M.2 slot. Please refer to the section "Intel RST Premium With Intel Optane System Acceleration" for details.

Recommended SATA controller mode settings:

- If you're using Windows Vista, Windows 7/8/10, or Linux kernel 2.6.19 or later, you can select **AHCI** mode for better performance.
- If you are looking for faster hard drive read/ write performance, please install an SSD (M.2, mPCle, SATA) or install an Intel Optane memory for hard drive acceleration.

To set SATA controller mode:

- 1. When system boots up, press F2 to enter BIOS setup utility.
- 2. Go to [Advanced] > [SATA Configuration].
- 3. Highlight the SATA, mSATA or M.2 port you wish to set and press Enter to bring up setting options. Scroll to and highlight the setting you wish to set and press Enter.

- 4. Repeat step 3 to set other SATA ports.
- 5. Press F10 to "Exit Saving Changes".

## 4.1.3 TPM Availability

Trusted Platform Module (TPM) is a hardware-based cryptoprocessor to secure hardware by integrating cryptographic keys into devices. The system is designed with on-board TPM 2.0 module. As TPM 2.0 requires 64-bit Windows 7/8/10 with UEFI boot mode, it is disable in BIOS by default. For customers who want to utilize TPM feature, you will need to enable TPM in BIOS as well as install Windows with UEFI mode.

To enable TMP availability:

- 1. When system boots up, press F2 to enter BIOS setup utility.
- Go to [Security] > [TPM Availability], press Enter to bring up Options, Available/ Hidden.
- 3. Highlight your selection, press Enter and press F10 to "Exit Saving Changes".

### 4.1.4 Auto Wake on S5

Users can specify the S5 state reaction of the system in the event of a power failure.

Value	Option	Description
Auto Wake on S5	Disabled	The system does not turn on when operating in state S5.
	By Every Day	The system turns on each day when operating in state S5. Specify the time of day.
	By Day of Month	The system turns on each month when operating in state S5. Specify the day and
		time.

Highlight your selection, press Enter and press F10 to "Exit Saving Changes".

#### 4.1.5 Power On After Power Failure Option

This option defines the behavior of System series when DC power is supplied.

Value	Description
S0 – Power On	System is powered on when DC power is supplied.
S5 – Power Off	System is kept in off state when DC power is supplied.

To set "Power On after Power Failure" option:

- 1. When system boots up, press F2 to enter BIOS setup utility.
- 2. Go to [Power] > [Power On after Power Failure].
- 3. Scroll down to highlight [Power On after Power Failure], press Enter to bring up setting options, S0 Power On or S5 Power Off, and press Enter to select the setting.
- 4. Press F10 to "Exit Saving Changes".

## 4.1.6 Power & Performance (CPU SKU Power Configuration)

The system supports various 6<sup>th</sup>-Gen Skylake LGA1151 CPUs. A unique feature, "**SKU Power Config**" is implemented in BIOS to allow users to specify user-defined SKU power limit. Although the system is designed to have best thermal performance with CPUs of 35W TDP, you can install a 65W CPU and limit its SKU power (to35W) to obtain more computing power. This feature gives you the flexibility of CPU selection and great balance between computing power and operating temperature range.

To configure the CPU SKU power limit:

- 1. When the system boots up, press F2 to enter BIOS setup utility.
- 2. Go to [Power] → [Power & Performance].

Select a proper value of SKU power limit for [SKU Power Config] option.

## 4.1.7 Wake on LAN Option

Wake-on-LAN (WOL) is a mechanism which allows you to turn on your System series via Ethernet connection. To utilize Wake-on-LAN function, you have to enable this option first in BIOS settings. Please refer "Powering On Using Wake-on-LAN" to set up the system.

To enable/disable "Wake on LAN" option:

- 1. When system boots up, press F2 to enter BIOS setup utility.
- 2. Go to [Power] > [Wake on LAN].
- 3. Press Enter to bring up setting options, scroll to the setting you desire and press Enter to set.
- 4. Press F10 to "Exit Saving Changes.

#### 4.1.8 Boot Menu

The Boot menu in BIOS allows you to specify the system's boot characteristics by setting bootable device components (boot media) and method. Or, you may press F12 upon system start up and select a device you wish boot from.

Value	Option	Description
Boot Type	Dual Boot Type	Both legacy and EFI boot media listed are
		approved as boot media.
	Legacy Boot	Only legacy boot media listed are approved as
	Туре	boot media.
	UEFI Boot Type	Only legacy boot media listed are approved as
		boot media.
Quick Boot	Enabled	The system starts up faster because BIOS skips
		various hardware function tests
	Disabled	The system starts up slower because BIOS goes
		through various hardware functions tests
Network Stack	Enabled	The system is available for network access
		using UEFI.
	Disabled	The system is not available for network access
		using UEFI.
PXE Boot	Disabled	Only UEFI Network Stack is supported: Preboot

capability		eXecution Environment (PXE) is not supported
	Enabled	By enabling the PXE boot, one can choose to
		boot via I219 Only/ I210 Only or All NICs.
Add Boot Options	First	Newly detected boot media are placed at the top
		of the boot order.
	Last	Newly detected boot media are placed at the
		bottom of the boot order.
ACPI Selection	1.0B/ 3.0/ 4.0/	Advanced Configuration and Power Interface
	5.0/ 6.0	allows the operating system to control system
		power management
USB Boot	Enabled	Allow boot from bootable USB devices.
	Disabled	Does not allow boot from bootable USB devices
EFI Device First	Enabled	Set to boot bootable EFI media first.
	Disabled	Will not boot bootable EFI media first.
Timeout	1, 2, 3, etc (in	Boot delay time in seconds to give the user time
	seconds)	to activate the hotkey to access the BIOS
WDT for booting	Disabled, 1, 3, 5,	WDT ensures a successful system boot by
	10 (minutes)	specifying a timeout value

## 4.1.9 Boot Type (Legacy/ UEFI)

The system supports both Legacy and Unified Extensible Firmware Interface (UEFI) boot modes. UEFI is a specification proposed by Intel to define a software interface between operating system and platform firmware. Most modern operating systems, such as Windows 7/8/10 and Linux support both Legacy and UEFI boot modes. The Legacy boot mode uses MBR partition for disk and VBIOS for video initialization, the UEFI boot mode uses GPT partition which supports greater than 2TB partition size and GOP driver for faster video initialization.

It is recommended that:

- If you need greater than 2TB disk partition or want to use TPM 2.0 function, you shall choose UEFI boot mode and install operating system accordingly.
- You may choose Legacy boot mode if the installed HDD/ SSD capacities are under
   2TB

To configure Boot Type:

- 1. When system boots up, press F2 to enter BIOS setup utility.
- Go to [Boot] > [Boot Type], press Enter to bring up options, Dual Boot (Legacy+UEFI), Legacy Boot Type, UEFI Boot Type.
- 3. Highlight your selection and press Enter.
- 4. Press F10 to "Exit Saving Changes".

#### 4.1.10 Position New Boot Device

The "Add Boot Options" allow you to determine whether a newly added device (eg. USB flash disk) is to boot as the first device to boot or the last in the boot sequence.

To set the newly-installed boot device as the first or last boot device:

- 1. Press **F2** when the system boots up to enter the BIOS setup utility.
- 2. Go to [Boot] > [Add Boot Options] menu.
- 3. Select [First] or [Last] for your newly-added boot device and press Enter.

4. Once set, press **F10** to save setting and exit.

#### 4.1.11 Watchdog Timer for Booting

The watchdog timer secures the boot process by means of a timer. Once the timer expires, a reset command is issued to initiate another booting process. There are two options in BIOS menu, "Automatically after POST" and "Manually after Entering OS". When "Automatically after POST" is selected, the BIOS automatically stops the watchdog timer after POST (Power-On Self Test) OK. When "Manually after Entering OS" is selected, the user must stop the watchdog timer once booted into the OS. This guarantees the system can always boot into the OS, otherwise another booting process will be initiated. For information about programming watchdog timer, please refer to Watchdog Timer & Isolated DIO.

To set the watchdog timer for boot in BIOS:

- 1. When system boots up, press F2 to enter BIOS setup utility.
- 2. Go to [Boot] menu.
- 3. Disable or select timeout value for **[WDT for Booting]** option.
- 4. Once you give a timeout value, the **[WDT Stop Option]** option appears. You can select "Automatically after POST" or "Manually after Entering OS".
- 5. Press F10 to "Exit Saving Changes.

#### 4.1.12 Legacy/ UEFI Boot Device

When you wish to set a designated boot device, you may set it as the first device to boot in Legacy or UEFI Boot Device setting. Or if you wish to manually select a boot device, you may do so by pressing F12 when the system boots up.

To set boot order for devices in UEFI Boot Device:

- 1. When system boots up, press F2 to enter BIOS setup utility
- 2. Go to [Boot] > [UEFI Boot Device]
- 3. Highlight the device you wish to make boot order changes to and press F5/ F6 or +/to change device boot order.

To select boot order for devices in Legacy Boot Device:

- 1. When system boots up, press F2 to enter BIOS setup utility
- Go to [Boot] > [Legacy Boot Device], you can choose the type of device to list by selecting "By Device or By Device Type".
- 3. Highlight the device you wish to make boot order changes to and press F5/ F6 or +/to change device boot order.

## 4.2 AMT Configuration

Intel® AMT (Active Management Technology) is a hardware-based technology for remotely managing target PCs via Ethernet connection. The system supports AMT function via its Ethernet port implemented with Intel I219-LM. Prior to using the AMT function to remotely control the system, you need to configure AMT password and network settings.

1. Connect Ethernet cable to I219-LM Ethernet port (indicated in blue).

2. When the system boots up, press F10 to enter the MEBx configuration menu.

3. Highlight MEBx Login and press Enter, a prompt will appear asking for password. The default password is "admin". For further MEBx configuration details, please refer to <a href="Intel® MEBX User Guide">Intel® MEBX User Guide</a>.

## 4.3 RAID Configuration

The system supports RAID 0 or 1 options. To utilize the RAID function, the minimum HDDs/ SSDs must be installed for the following RAID configurations:

**RAID 0:** Two HDDs or SSDs **RAID 1:** Two HDDs or SSDs

#### NOTE

It is recommended that the HDDs/ SSDs used are of the same model, same capacity, rpm, etc. to avoid compatibility or performance bottleneck.

To set up RAID configuration, you need to pre-configure the SATA mode setting in the BIOS. Please refer to the following steps:

- 1. When system boots up, press **F2** to enter BIOS setup utility.
- 2. Go to [Advanced] > [SATA Mode Selection] and press ENTER.

- 3. Highlight "RAID" and press ENTER to make your selection.
- 4. Press F10 to Save and exit the BIOS.

5. Upon reboot, press "Ctrl + I" to enter the RAID configuration utility

```
4.
5.
                                                                      Recovery Volume Options
Acceleration Options
                  Delete RAID Volume
Reset Disks to Non-RAID
            2.
            3.
                                                                6.
                                                                      Exit
                                     =[
RAID Volumes:
                                  Level
RAIDO(Stripe)
                                                                         Size Status
119.2GB Normal
ID
       Name
                                                             Strip
                                                                                                       Bootable
       Volume
                                                              32KB
                                                                                                           Yes
Physical Devices:
ID Device Model Serial #

       SAMSUNG MZRPC128 SØT6NY5BC63455
                                                                         59.6GB Member Disk(0)
```

Please refer to the on screen RAID MENU options and instructions for configuration.

## 5 OS Support and Driver Installation

## 5.1 Operating System Compatibility

The system supports most operating system developed for Intel® x86 architecture. The following list contains the operating systems which have been tested by Neousys Technology.

- Microsoft Window 8 (x64)
- Microsoft Window 10 (x64)
- CentOS 7
- Debian 8.7\*\*
- Fedora 24\*\*
- OpenSUSE 42.1\*\*
- Ubuntu 14.04.4 LTS and 16.04 LTS\*\*

## NOTE

- \* For Linux system, user may need to manually compile and install the driver for Intel graphics or I210 GbE controller if the driver is not embedded in kernel. You can visit Intel website for further information.
- \*\* For distributions, graphics driver and RAID function may not be completely implemented in its kernel. You may encounter restrictions when using these features, such as triple independent display and RAID. For optimum operation, it is the users' responsibility to manually check for new drivers and upgrades!

Neousys may remove or update operating system compatibility without prior notice. Please contact us if your operating system of choice is not on the list.

## 5.2 Driver Installation

The system comes with a "Drivers & Utilities" DVD that offers "one-click" driver installation process. It automatically detects your Windows operating system and installs all necessary drivers for you system with a single click.

## 5.2.1 Install Drivers Automatically

The system comes with a "Drivers & Utilities" DVD that offers "one-click" driver installation process. It automatically detects your Windows operating system and installs all necessary drivers for you system with a single click.

To install drivers automatically, please refer to the following procedures.

1. Insert the "Drivers & Utilities" DVD into a USB DVD-drive connect to your system. A setup utility launches and the following dialog appears.

Click on "Automatic Driver Installation" and the setup utility will automatically detect your Windows operating system and install all necessary drivers. The installation process takes about 6~8 minutes depending on your Windows version. Once driver installation is done, the setup utility reboots your Windows and you may begin using your system.

## 5.2.2 Install Drivers Manually

You can also manually install each driver for the system. Please note when installing drivers manually, you need to install the drivers in the following sequence mentioned below.

#### Windows 10 (x64)

The recommended driver installation sequence is

- 1. Chipset driver (x:\Driver\_Pool\Chipset\_10\_APL\Win\_ALL\SetupChipset.exe)
- Graphics driver
   (x:\Driver\_Pool\Graphics\_SKL\_APL\Win\_7\_8\_10\_APL\_64\Setup.exe)
- 3. Audio driver (x:\Driver\_Pool\Audio\_ALC262\Win\_ALL\_64\Setup.exe)
- LAN driver
   (x:\Driver\_Pool\GbE\_I210\_I350\Win\_ALL\_64\APPS\PROSETDX\Win10\_x64\DxSe tup.exe)
- 5. ME driver (x:\Driver\_Pool\ME\_10\_Series\Win\_ALL\_AMT\SetupME.exe)

## 5.3 Driver Installation for Watchdog Timer Control

Neousys provides a driver package which contain function APIs for Watchdog Timer control function. You should install the driver package (WDT\_DIO\_Setup.exe) in prior to use these functions. Please note that you must install WDT\_DIO\_Setup\_v2.2.8.x or later versions.

#### Windows 10 (x64)

Please execute the driver setup program in the following directory.

x:\Driver\_Pool\WDT\_DIO\Win7\_8\_64\WDT\_DIO\_Setup\_v2.2.8.x(x64).exe

#### Windows 10 (WOW64)

Please execute the driver setup program in the following directory.

x:\Driver\_Pool\WDT\_DIO\Win7\_8\_WOW64\WDT\_DIO\_Setup\_v2.2.8.x(wow64).exe

# 5.4 Intel<sup>®</sup> Optane<sup>™</sup> Memory BIOS Setup and Driver Installation

The system is compatible with Intel<sup>®</sup> Rapid Storage Technology that supports the installation of Intel<sup>®</sup> Optane<sup>™</sup> memory to significantly boost traditional hard disk drive read and write performances. Intel<sup>®</sup> Optane<sup>™</sup> memory is Intel<sup>®</sup> RST's latest system acceleration solution featuring a dual-media/ disk combination (ultrafast media for file and block caching + slow media for storage capacity) that is presented to the host OS as a single SSD. The ultrafast media utilizes PCIe NVMe SSDs that are based on Intel<sup>®</sup> Optane<sup>™</sup> technology with read speed of up to 3000Mb/ sec and write speed of up to 2000Mb/ sec.

To setup Intel<sup>®</sup> Optane memory, please perform the following steps:

- 1. Press the power button to startup your system (please restart if your system is already up and running) and press F2 to enter BIOS.
- 2. Go to "Advanced > SATA And RST Configuration".

 Go to "SATA Mode Selection", press the Enter key to bring up options, select "Intel RST Premium With Intel Optane System Acceleration" and press the Enter key to select the option.

4. Go to "M.2 2280 NVMe Storage Device" and press the Enter key to bring up the selection, select "RST Controlled" and press the Enter key to select the option.

- 5. Press F10 to save and exit, and allow the system to boot into Windows.
- 6. In Windows, download Intel® RST driver if you don't already have it on hand.

Right-click on the SetupOptaneMemory.exe and left-click on "Run as administrator" to execute the setup file.

7. Follow the 6 step setup procedure as instructed.

8. Check the "I accept the terms in the License Agreement" box and click on "Next >" to continue the installation process.

9. When done, click on "Finish" and restart the system.

10. Upon system restart, the following initialization screen will appear. Click on Next to continue.

11. In the Setup section, you will see your Intel® Optane™ memory drive and compatible drive(s) that can be accelerated. Click on the downward arrow to bring up a selection of drives to be accelerated. Click on "Enable" when ready.

12. The data backup warning will appear, please backup any data you may have stored on your Intel® Optane™ memory module before proceeding. Check the box "Erase all data on Intel® Optane™ memory module" and click on Continue.

13. When the Intel® Optane<sup>™</sup> memory module has been enabled, the installation window and a notification window at the bottom right corner will prompt you to restart the system.

 Upon system restart, a successful enablement message will appear to indicate the Intel® Optane™ memory module has been enable successfully.

15. Once enabled, the RST software Setup section should show your configuration information.

# **Appendix A Using WDT & DIO**

The watchdog timer (WDT) function to ensure reliable system operation. The WDT is a hardware mechanism to reset the system if the watchdog timer is expired. Users can start the WDT and keeping resetting the timer to make sure the system or program is running. Otherwise, the system shall be reset.

In this section, we'll illustrate how to use the function library provided by Neousys to program the WDT functions. Currently, WDT driver library supports Windows 10 x64 and WOW64 platform. For other OS support, please contact Neousys Technology for further information.

#### Installing WDT\_DIO Library

The WDT\_DIO function library is delivered in the form of a setup package named WDT\_DIO\_Setup.exe. In prior to program WDT, you should execute the setup program and install the WDT library. Please use the following WDT\_DIO\_Setup packages according to your operating systems and application.

- For Windows 10 64-bit OS with 64-bit application (x64 mode), please install WDT\_DIO\_Setup\_v2.2.8.x(x64).exe or later version.
- For Windows 10 64-bit OS with 32-bit application (WOW64 mode), please install WDT\_DIO\_Setup\_v2.2.8.x(wow64).exe or later version.

## **WDT and DIO Library Installation**

To setup WDT & DIO Library, please follow instructions below.

1. Execute WDT\_DIO\_Setup.2.2.8.x.exe. and the following dialog appears.

2. Click "Next >" and specify the directory of installing related files. The default directory is C:\text{Weousys\text{WDT\_DIO}}.

3. Once the installation has finished, a dialog will appear to prompt you to reboot the system. The WDT & DIO library will take effect after the system has rebooted.

4. When programming your WDT or DIO program, the related files are located in

Header File:	\Include
Library File:	\Lib
Function Reference:	\Manual
Sample Code:	\Sample\WDT_Demo (Demo for Watchdog Timer)

## **WDT Functions**

## InitWDT

Syntax	BOOL InitWDT(void);	
Description:	Initialize the WDT function. You should always invoke InitWDT() before set or start watchdog timer.	
Parameter	None	
Return Value	TRUE: Successfully initialized	
	FALSE: Failed to initialize	
Usage	BOOL bRet = InitWDT()	

## **SetWDT**

Syntax	BOOL SetWDT(WORD tick, BYTE unit);	
Description	Set timeout value and unit for watchdog timer. When InitWDT() is invoked, a default timeout value of 255 seconds is assigned.	
Parameter	tick WORD value (1 ~ 65535) to indicate timeout ticks.	
	unit  BYTE value (0 or 1) to indicate unit of timeout ticks.  0 : unit is minute  1: unit is second	
Return Value	If value of unit is correct (0 or 1), this function returns TRUE, otherwise FALSE.	
Usage	WORD tick=255;  BYTE unit=1; //unit is second.  BOOL bRet = SetWDT(tick, unit); //timeout value is 255	
	seconds	

## **StartWDT**

Syntax	BOOL StartWDT(void);
Description	Starts WDT countdown. Once started, the WDT LED indicator will begin blinking. If ResetWDT() or StopWDT is not invoked before WDT countdowns to 0, the WDT expires and the system resets.
Parameter	None
Return Value	If the timeout value is given in correct format (WDT started), this function returns TRUE, otherwise FALSE
Usage	BOOL bRet = StartWDT()

## **ResetWDT**

Syntax	BOOL ResetWDT(void);
Description	Reset the timeout value to the value given by SetWDT().If
	ResetWDT() or StopWDT is not invoked before WDT
	countdowns to 0, the WDT expires and the system resets.
Devementer	Nanc
Parameter	None
Return Value	Always returns TRUE
Usage	BOOL bRet = ResetWDT()

## StopWDT

Syntax	BOOL StopWDT(void);	
Description	Stops the countdown of WDT. When WDT has stopped, the WDT LED indicator stops blinking.	
Parameter	None	
Return Value	Always returns TRUE	
Usage	BOOL bRet = StopWDT()	

# **Appendix B PoE On/ Off Control**

Nuvo-7000series offer 802.3at PoE+ ports and users are allowed to manually turn on or off the power supply of each PoE port. This can be useful in power device (PD) fault-recovery or power reset. The APIs are part of Neousys WDT\_DIO driver package. Please follow the instructions in <a href="Appendix A Watchdog Timer & Isolated DIO">Appendix A Watchdog Timer & Isolated DIO</a> for installation before programming PoE on/off control function.

#### NOTE

Nuvo-7000E/P series will be shown in illustrations for demonstration purposes.

## **GetStatusPoEPort**

Syntax	BYTE GetStatusPoEPort (Byte port);	
Description	Get current on/off status of designated PoE port.	
Parameter	port	
	BYTE value specifies the index of PoE port. Please refer to the	
	following illustration, <i>port</i> should be a value of 3 ~ 6	
Return Value	BYTE value indicating PoE on/off status	
	0 if port is disabled (off)	
	1 if port is enabled (on)	
Usage	BYTE bEnabled = GetStatusPoEPort (1); //Get on/off status of PoE	
	Port#1	

PoE+ ports on the front panel.

## **EnablePoEPort**

Syntax	BOOL EnablePoEPort (BYTE port);
Description	Turn on PoE power of designated PoE port.
Parameter	port
	BYTE value specifies the index of PoE port. Please refer to the following illustration, <i>port</i> should be a value of 3 ~ 6
Return Value	TRUE if enabled success
	FALSE if fail to enable.
Usage	BOOL bRet = EnablePoEPort (1); //Turn on PoE Port#1

PoE+ ports on the front panel.

## **DisablePoEPort**

Syntax	BOOL DisablePoEPort (BYTE port);
Description	Turn off PoE power of designated PoE port
Parameter	port
	BYTE value specifies the index of PoE port. Please refer to the following illustration, <i>port</i> should be a value of 3 ~ 6
Return Value	TRUE if disabled success
	FALSE if fail to disable
